

CHargER

Written By: Victor

SUMMARY

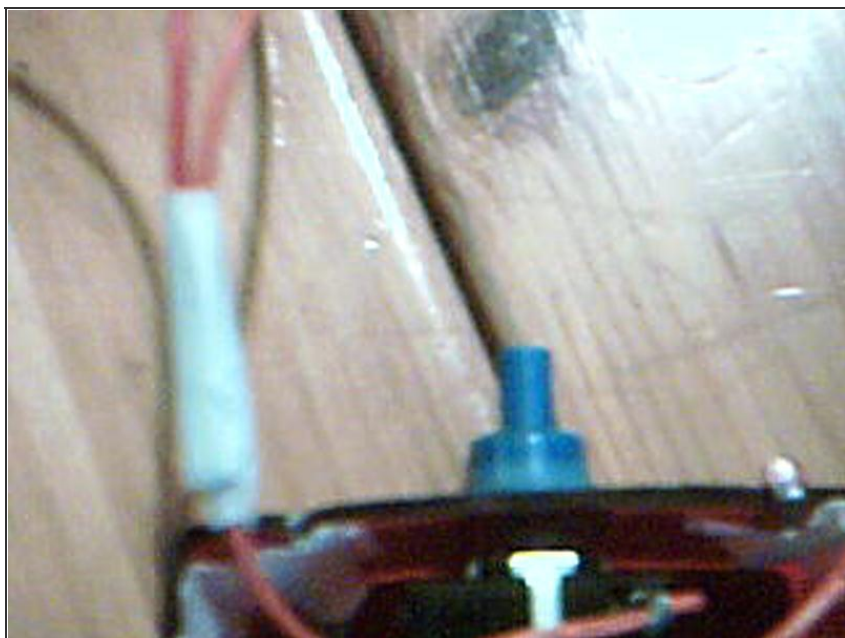

A cool charger that is made from stuff of Russia and you are gonna need a switch.

Step 1 — CHargER

- You will need:
- A box, cables, switch and batteries.

Step 2

- Mount your switch and connect it with the two positive side connections.

Step 3

- Once that is done you will have to put a wire on the bottom of your box.
- The one side will represent - and the other side will represent +.
- Next:
- The one side of the Positive connection will go on the one side and the other side of it will connect with the device.
- And now on the upper left side of the box put another cable and you are done
